

Master's Program Geo- and Paleobiology (MGAP)

Now starting every Winter Semester!

MGAP is a, research-oriented, international master program of the Faculty of Geosciences, LMU, in collaboration with the Bavarian State collections and the GeoBio-Center^{LMU}.

MGAP aims to provide students with a comprehensive introduction into the interdisciplinary research fields of Geo- and Paleobiology to prepare them for careers in science and beyond.

Principal topics are evolutionary and environmental geobiology and paleobiology, supported by complementary fields e.g., bioinformatics, statistics, sedimentology.

MGAP teaches routines of a wide range of modern scientific methods such as molecular biology, isotope geochemistry, fieldwork, collection management, bioinformatics and statistics.

MGAP in brief

- International Master's program in Geobiology and Paleobiology (Master of Science, M.Sc.) at the LMU Munich
- 2 years, 4 semesters, start in October (winter semester)
- All courses taught in English
- Courses are combined in modules
- Course total: 120 ECTS credits
